Motorola Ht750: Portable Heavy Duty Radio Set by [Randy James](#)

Article published on July 5th 2012 | [Satellite](#)

With increasing workload and the area of the work widening, people are constantly on the move. They do not have the time to report back to their seniors or keep planning meetings with their colleagues to coordinate but need to stay in contact all the time to give or take directions or update others about the progress. A very reliable and heavy duty gadget which can easily solve the problem of such professionals is the radio Motorola ht750.

The ht750 portable model comes with the two year warranty and is equipped with the X-Pand technology which enhances the audio quality. The radio provides a very good sound quality which is clean even in noisy environments. These radios are multi functional and can be used in various industries and places like construction sites, hotels and other hospitality related industries, factories and manufacturing plants, in the entertainment industry like movie sets etc. This model also has various additional features which make it a very good radio mobile set. There are up to 16 frequency channels available on the radio and it also has an emergency siren button. The buttons on the radio set are programmable making it easy for the user to access the features present in the set.

This Motorola ht750 set also has an option to adjust the radio battery usage to high power or low power which helps in conserving the battery life. The monitor transmissions make it easy to locate channels and the scan mode feature allows the user to scan channels for activity. Another great feature that allows unit-wise communication is the Repeater Talk around. All these additional features in a standard radio mobile set make ht750 model a great choice for many professionals who are constantly on the move and also make the communication easier, clearer and simpler.
