The Benefits of Car Leasing by [Robbert H Cullen](#)

Article published on July 27th 2012 | [Self Help](#)

Nowadays, more and more people are car leasing instead of buying a new car. This is mainly because car leasing is more cost-effective. You get to use the car without having to buy it. The concept of leasing a car is similar to renting it for a longer period of time.

One of the benefits of car leasing is that the monthly payments are fixed. You do not have to contend with fluctuating interest rates or additional charges on your monthly fees. The amount that you have agreed to as your monthly payment on your lease contract will remain the same until the expiration of the lease. The fixed monthly fees will be easier on your budget.

Another benefit of car leasing is that the cost of maintenance and servicing could be included in the lease. This means that you do not have to pay for anything should the leased vehicle break down or be in need of maintenance repairs. This is very advantageous because car breakdowns are unavoidable. Even new cars could break down and the cost of the repairs could be really expensive. When you lease a car then you no longer have to worry about the cost whenever your car breaks down.

When you lease a car, you only need to return it to the leasing company when the term ends and lease a new car once again. You no longer have to worry about disposing the old car before you can get a new car. You do not have to wait until the old car gets sold before you can get yourself a new car. There are times when it can really take some time before you can sell your car but when you are leasing one then you no longer have to worry about selling your old car. You just have to return the old car and then lease a new one.

When you lease a vehicle, you can lease it for a year or so and then when the contract ends you can lease another car that is a newer model. This means that you will be driving around in a new car most of the time. You no longer have to suffer driving an old car just because you do not have the money to buy a new one. If you do not have the money to buy a new car then you can just lease it.
