Microsoft new global delivery venture will create a considerable marketing sense for SEO company services in India as SEO company services can make better source of business to have a good marketing plan. These companies can now look for better marketing deal to go ahead for mutual business development.

Microsoft has declared that a new global delivery center will be started soon, which will be most probably situated in the heart of Bangalore's business district. Microsoft has announced on Thursday that they are spreading out its global consulting and enterprise services operations out of the country and they are expecting to have more business prospect with this delivery center. However sources said, "In addition to its team in Hyderabad, the Bangalore team will support Microsoft Services in powering business critical and mission critical applications for some of the world's largest corporations in over 65 countries."

Microsoft Consulting Services Business general manager Mr. Kristin Johnson said with regard to their new venture, "Microsoft Services brings the deepest expertise on Microsoft technologies to help customers plan, deploy and run their IT landscapes. It was with this in mind that Microsoft invested in the center at Hyderabad six years ago, and today, with a clear idea of growing our presence in India, we are happy to be in Bangalore. Our services bring the expertise on key technologies to help customers plan, deploy and run their IT landscapes."

Microsoft Consulting Services Business' General Manager Mr. Amit Sircar added with regard to this new venture, "In six short years, Global Delivery (Hyderabad) has been assessed at SEI CMMI Level 5, and we hope to maintain and improve this reputation for excellence with a group of highly motivated people in Bangalore."

Amit Sircar further said, "We have mature delivery process for global deployments. Local teams here work on leading edge products and technologies including Office 365 and Windows 7 deployment."

However, observing at the biggest development of Microsoft company, it can be estimated that a new edge can be curved out for this development prospect as all companies are in competition but this new step can surely define Microsoft to be above all performance based company.

Bringing this deepest skillfulness while helping customers plan, Microsoft technologies have been trying to invest more with a clear idea of growing and now this biggest step will surely make a solid footprint in its entire development as sources said.
