Top SEO Link Building Tips by Maria Gini

Article published on January 2nd 2012 | Seo

To be able to get a high keyword ranking, make use of guaranteed search engine optimization in building links. Popular search engines display their results through site's link popularity and/or your PageRank. To improve, a quality SEO is one good strategy.

SEO Tip No. 1

Websites necessitate organic links achieved over a long period of time. Don't make multiple links to the sites with the same server. Never purchase domains hosted on a single IP address. Post comments on do-follow blogs but never ever spam because this is one of the tested and proven guaranteed SEO practices. Fifty comments each day is good enough. By constantly doing this, your website links will naturally grow.

SEO Tip No. 2

Check the PageRank quality of those sites before submitting articles to different sites to be able to appear organic to the search engines.You must post links to sites whether its PageRank ranges from 7 to 9 but those with low values too.

SEO Tip No. 3

Be well-known of the search terms that direct the Internet users to your site for these phrases are converted into sales. Utilize guaranteed SEO tools like keyword density tool, Google Insights and Google Analytics to determine the most searched keywords leading to your site. Apply the most searched keyword phrases into the anchor texts you will work on through blog commenting and the likes.

By means of this method, the ROI increases as well as the organic links being crawled by the search engine bots.

You will definitely reach a high traffic for the keywords phrases as well as a relevant link promotion through following the tips above especially when offered by guaranteed SEO services company.

Always remember, quality links are more important than the quantity of links as to anchor text is more essential than PageRank.
