Article published on February 1st 2012 | [Seo](#)

Google Base service is an ideal service that allows you to submit and share your products and services online that makes it easy for online shopper to find information about products and services. If your products and services are not listed in Google Base, you're missing one of the major sources of targeted traffic to your online website.

Google Base is an online database provided by Google into which any user can add almost any type of content, such as text, images, and structured information in formats such as XML, PDF, Excel, RTF. If the look for programs knows it appropriate, provided content may appear on its buying SEO, The look for programs selection collection catalog index charts or even the web look for. The factor of content can then be well known with features like the substances for a strategy or the digital camera design for present automated photography. Because details about the support were released before group launch, it designed much interest in the group before launch.

The idea behind Google Base is to let Google gather better structured information, so that it can better serve the users the things they're really looking for. It is very hard for a search engine to extract the relevant information from a web-page, especially if it ignores the standard meta-tags. Google Base should help remedy that situation in that users can submit strictly structured data, with expiration date if they desire, adding "labels" to help end users browse and search for specific pages.
