Article published on December 23rd 2011 | Shoes

No matter what type of clothes you wear or what new fashion accessory you flaunt, if you do not focus on your footwear, tiredness and sore feet would be a common incident, at the end of the day. With new kinds of footwear being introduced on the market occasionally, it is difficult to choose the specific shoes that have all the qualities of comfort for walking. aetrex shoes are made from memory foam. Memory foam is known for its use in mattresses and now it has made its foray into shoes. The material is super comfortable and makes the footrest comfortably on the sole. There is no pressure or discomfort.

In fact, due to their features, orthopedic doctors frequently recommend these Aertex shoes for regular wear. The use of the memory foam lining makes the product one of a kind. Like the memory foam mattresses, the lining in the shoes helps to balance your body pressure. The material is so flexible that it stretches from the ankle base to the rear layout.

Due to the use of memory foam, the shoes are stretchable and flexible. You can just slip on the shoes when you are in a hurry. In other words, they do not require any adjustment. The flexibility and comfort factor makes the product innovative casual footwear. For customized comfort and help in relieving foot pain, the manufacturers use Mosaic Customization Technology. With this technology, the stretch fabrics are inbuilt into the foot bed and for increased adjustability and flexibility side straps are used.

When you wear these aetrex shoes, you get a feeling of being weightlessness. For a few moments, it feels as if you are barefoot and nothing envelops your foot. Due to their lightweight, you do not even feel like you are wearing any shoes while walking. They also have inbuilt Aegis foot bed linings for anti-microbial purposes. The technology prevents the feet from developing algae, bacteria, and fungal infections.
