Choose the right school bag for your kid by Manav Rana

Article published on July 11th 2012 | Shoes

Summer vacations are a real fun for kids. Children enjoy a lot during this time. They get engaged in their favorite sports, watch TV, play video games, etc. to enjoy the every bit of their vacations to the most. They feel free as they donâ€™t require getting up early in the morning and going back to bed early at night. However, as soon as the summer vacation comes to an end, parents start probing various stores to get new books, stationary, shoes, school bags, etc. for their kids. To make the first day of the school an exciting experience for your little angel, ensure that you get all the required stuff for him or her. Above all, you must bring a new bag that helps your kid carry his or her basic school essentials easily.

Well, the idea of buying a school bag may seem exciting to most parents. But as the market is brimming with lots of choices, you may find choosing the right school bag a tough decision. Itâ€™s better to take your child with you for buying the new bag as his or her preferences matter the most. Backpacks are really good for young kids as the comfy straps help distribute the weight equally on both the shoulders. These bags come in exciting patterns and enjoyable prints like cartoons and other fun prints that make these bags a favorite of kids within almost no time.

Some tips that would help you choose the best school bag for your kid are:

1)Get the right size and the best fit. Ensure that the backpack that you choose fits well between the top of your childâ€™s shoulders and lower back. A bigger backpack is not always a right choice as it provides more room to keep more stuff, hence making the bag heavier to carry. However, a decent space is necessary.

2)Pick a bag that has comfortable and adjustable shoulder straps and fits snugly to your childâ€™s back. The wide and comfy straps would distribute the weight broadly across your childâ€™s shoulders. Hence, making it easier for the kids to carry their bags.

3)A bag with padded back is a good option as it adds more comfort.

4)Instead of going for a backpack that has a big single compartment, choose a backpack that has many smaller compartments. These smaller compartments will help your kids stay organized as they can keep different stuff in different sections. More compartments would also help balance the weight.

5)The material of the bag is another big thing to be considered. Choose a backpack that is easily washable and is durable too.

6)Nice imprints and cool hues attract most kids, so consider the look of the bag as well.

A big range of backpacks available in the market help parents choose the perfect one for their children. Other than looks, functional kids school bags are really important to help children stay organized for the whole day at school. To make studies a fun activity for your kid, choose a right school bag.
