Add elegance to the occasion by getting customized table and chair covers by [Chaircoverdepot](#)

Article published on August 22nd 2012 | [Shopping](#)

The decoration of the wedding venue is a very important part of the event. Every tiny detail of the place is to be taken under consideration. The decoration of the place is the first thing to be noticed by the guests. A unique style of decorating the wedding place changes the whole outlook of the area. This includes decorating the ceremony stage with flowers, ribbons and balloons, the tables and chair decoration and the lighting style.

The decoration of the wedding table and chair is not limited to just placing a cover on them. It includes many things like placing fancy colored linens with ribbons and putting the crockery and the table napkin in style. Dressing the table with beautiful table linens is the most dramatic way to change the appearance of the place. It adds beauty, elegance and style to the party. There are many decoration shops which offer table linens for sale in a varied range on very cheap prices.

These special covers for tables and chairs come in different colors and stuffs stitched in very beautiful styles to add to the glamour of the venue. Before buying these, you should keep certain points in mind, the very first of which is whether the event planner, caterer or the hotel is providing you the tablecloth. Sometimes these are included in the package deal but many times it has been observed that the caterers provide standard chair and table covers which look very ordinary. You should ask them if they have any other option for these or if they will refund a small part of the package deal for using the linens purchased by you before you get your own tablecloths.

Now is the question of points to be kept in mind while purchasing your own linens. The first decision to be taken is the color of the cloth. Commonly used colors are white, ivory, black, burgundy and chocolate. Make sure the color you select goes well with the color of room decorations to maintain the theme of the wedding. You can also try mix and match like using two colors for the cloth one of which will be the basic cover color and the other can be placed as an additional smaller size table runner and tied back to the chair.

The next thing is to look for how much cloth will be needed as a whole to stitch covers for all tables and chairs of the dining hall. You can take the help of the caterer or the wedding planner to make the estimate. Keep in mind that a small portion of the cloth is to be kept hanging at the sides of the table. It can be kept touching the floor or a half way drop. Of course your budget should be kept in mind while taking all these decisions. A smart way of saving your wedding expenses is to get the table cloth from the hotel itself and purchase a customized table runner with matching chair decorations. You can also look for online suppliers who offer table linens for sale to get a more varied range of table linens.
