Choose a luggage bag that speaks for your personality by [Manav Rana](#)

Article published on July 13th 2012 | [Shopping](#)

A human being, it is said, is originally a wanderer, a true nomadic since prehistoric times and even before. He discovered fire, made wheels, invented tools and slowly learnt to settle down at one place. But the inner and most basic of his conscience has always been that of a roamer and hence travelling is one thing he would never part ways with. With the advent of 21st century, travelling has changed in a lot of ways and the modern and sophisticated man now not just travels for his needs and other amenities, but also for the purpose of work, discovering new people, new places, and new things, as well as to give themselves a break from the daily routine of life. Today's man travels with the indispensable cell phone, the laptop PC, in addition to his clothes and luggage bag, whether it is a family trip or an individual tour.

While all others thing can be picked up without much concern and remain functional as much as the same, luggage bags are one of those things that you need to consider with much thought and purpose. A wrong travel bag taken on the trip might make you feel either too burdensome or just too scanty for your purpose. For example, if you have stuffed all your dear and near things with you in a large travelling trolley bag, but your stay outstation is going to be very short, say, for a day or two, it is obvious that you would be carrying just extra and useless weight over your shoulders.

Similarly, small luggage bags won't do you any good on trips that are longer and especially the holiday tours and vacation journeys. The strength of the trolley or travel bag is also very important. And last but not the least, comes the safety feature of the luggage bag you are carrying. Leaving your luggage and important goods on the luck is not a good idea. Tour places and tourist destinations are always encroached with thieves, pick pockets and dubious touts. Your wallet and other articles should be quite safe in the luggage bag all the time.

In case, you are wondering about the right size of bag and want to travel very light, a men's duffle bag would simply ease your choices. A lot of brands offer a variety of duffle bags that would suit your schedule. Nike, Peter England, VIP, Adidas, American Tourister, Samsonite, Puma, Fila, Quicksilver, Fastrack, and many other premium brands offer men's duffle bags at affordable and varying prices. Online shopping stores like Jabong are a great place to check out the one that would suit your needs and personality in all ways.

In fact, Jabong has a vast collection of latest men's duffle bags. You can carry a duffle bag to your gym or yoga classes, to an intra-city trip or excursion with your family, to golf hours, to your work as well. The all leather men's duffle bags are elegant and classy enough to carry them to any place, even to meetings and appointments. You can very easily keep you mobile phone, iPad, and other gadgets inside it and there would still be a lot of space to put in a pair of clothes and other things. If there is a quick outing plan decided amongst you and your friends or colleagues, the men's duffle bag would be your best bet ever.
