Contour HD Helmet Cameras by Julia Kiessling

Article published on December 29th 2011 | Shopping

You are probably pretty good at your chosen activity or physical endeavor and fancy increasing your enjoyment even further. If you haven't realized already, the straightforward answer is to invest in a Contour HD Helmet Camera. There are many other brands and options available to you, with prices commencing at $90 through $350, but there are a number of factors to consider such as Design, Reliability, Lightness, After-Sales Service etc..

If you are like me you value all of the above, so let me suggest that you ought to definitely consider the Contour HD Helmkamera. Below are some points that you may wish to think about:

â€¢ The ContourHD is the world's smallest wearable video camera, and weighs only 4.3 ounces, also fitting into the palm of your hand.

â€¢ It has available a wide selection of mounts. It means that you can fix your camera to many areas in addition to your helmet.

â€¢ It has 2 frame rates which means that you get a smooth replay of those fast action sequences.

â€¢ Your contour roam possesses 'Easy Edit' software which means that it is highly configurable.

â€¢ It has a high-performance Internal Micro SD Memory Card to give you hours of HD quality action...equivalent to a 16GB memory card.

â€¢ The Contour GPS is designed to keep wind noise to a minimum so that you can add to the experience of it's full audio.

â€¢ This Helmet contour kamera has a 1 button slide control which means that you can operate it with gloves on!

â€¢ The camera lens rotates an impressive 192 degrees and has 2 lasers, one either side. It follows that your shots are lined up every time.

â€¢ The body of the Contour HD is manufactured from anodized aluminum and this makes the contour plus rust-proof and shock resistant as well as keeping out snow, water, mud and dust.

With the above facts in mind, I hope that you want to investigate further the possibility of investing in the Contour HD Helmet Cam.

Or... are you looking for the ultimate in High Definition Helmet Cameras? Then you must look at the Contour HD 1080P, the professional user's choice. It is the very first 1080p HD Helmet Camera.

The Contour HD 1080P Helmet Cam shares it's cutting edge technology with the Contour HD but has some additional features requested by the experienced or professional user. These are as follows:

â€¢ Would you like to show your exploits on your HDTV? The Contour 1080P allows you to do just that.

â€¢ A few more facilities were demanded because they wanted extra flexibility and control over their shooting. It has a total of 10 settings... 4 High Definition settings, 2 frame rates and microphone,

contrast, metering and exposure controls.

â€¢ Are you the kind of person who possesses a high-spec computer equipped to process large video files? Then this is the Helmet Cam for you.

â€¢ The 1080P will record over 3 and 1/2 hours of 1080P video or 8 hours of contour HD... the choice is yours.

â€¢ This Contour camera also possesses a higher resolution sensor.

So, if you are a perfectionist looking for those additional refinements, the 1080P may just be for you, at only $50 more.

If you are reading this then you might have a Helmet Cam already and know first-hand the pleasure to be gained in being able to re-live your exploits, whether in the sky, on the waves or on the ground. You will, almost certainly, already have a Full HD TV or one that has the appropriate receiver attached.

Imagine being able to watch your skill and daring when paragliding or skydiving. View once more your mastery of a great wave when surfing. Likewise with snowboarding or skiing where you can re-live those daring descents.

No matter which helmet cam you have used before, you are in for a pleasant surprise with this Contour, the very first Full HD 1080P model. Just like it's brother, you can fix the Contour HD 1080P virtually anywhere with its selection of mounting aids. You can even fit the HD 1080P to your goggles and not move them. The reason is, of course, because it weighs just 4.3 ounces! You can also fit the Contour HD1080P to virtually any part of any motorized vehicle, whether 2 or 4 wheels. See both cameras at HiDefHelmetCams.
