Electronic Cigarettes a Cleaner Way to Smoke

by Haley Oliver

Article published on December 6th 2011 | Shopping

It looks like a cigarette, feels like a cigarette, and could fool any bigwig of Big Tobacco at a distance. Still, the electronic cigarette offers a uniquely different smoking experience than those standard tobacco sticks that require a lighter. A cleaner choice, electronic cigarettes are blessedly free of tar and toxic chemicals. And that makes them a smokerâ€™s new best friend.

Theyâ€™re known as E cigarettes, electronic cigarettes and E cigs, but no matter the name, the best formulas feature widely recognizable substances such as nicotine and propylene glycol. Though habit-forming, nicotine by itself does not seem to pose as much of a health risk as the entire â€˜packageâ€™ that is a standard cigarette. Secondhand smoke is not an issue with the electronic cigarette, and in many studies, carcinogen levels are significantly lower. This is great news to those who enjoy smoking but are aware of the much-publicized dangers of standard tobacco cigarettes.

Still, every study on earth matters nothing if smokers do not enjoy smoking electronic cigarettes. This is where the ingenuity of certain E cigarette formulary developers has come to truly shine. Not only are electronic cigarettes manufactured to mimic the â€˜feelâ€™ of an old-fashioned cigarette, but they are available in a multitude of flavors. This list includes standards such as menthol and unscented and extends to the creative realm of apple, cookie dough, espresso, chocolate, and even roast chicken.

For the traditionalist, tobacco flavors are available as well, making the e cig smoking experience as close to the â€˜oldâ€™ way of smoking as possible. Smokers who are simply looking for that familiar nicotine jolt can select unscented vapors as well. However, those who feel like taking their smoke to a new level are choosing to embrace the different vapors available, even mixing drops together to form their own personal flavor extravaganzas. Never before has smoking a cigarette presented so many different choices.

No longer saddled by a few flavors of cloves or standard cigarettes, the E cigarette consumer is embracing his creative side and becoming truly inspired. Without all that tar and concoction of toxic chemicals to put a rancid edge on the taste, the complexity of the E cigarette is markedly crisp, distinct, and, above all, clean. Itâ€™s an experience that is being embraced by smokers worldwide. Overwhelmingly, those who try e cigarettes remark that they will never again go back to smoking regular cigarettes.

E cigarette smokers are able to take smoke breaks and return to work without the evidence on their shirts. The vapors smell and taste fresh; unlike cigarettes you must light, there is no lingering smoke to carry around on an outfit after youâ€™ve enjoyed your smoke. An ashtray is not required. And with so many different color combinations to choose from, your e cigarette is now an actual accessory. The landscape of smoking is cleaner and more desirable than ever before. Join the growing number of people who are embracing e cigs as the new way to smoke.
