Embroidery Design, Digitizer and Embroidery Digitizing Services

With the growth of the computerized machines, embroidery digitizing services are booming into popularity. Before the advent of computerized machines to help make Embroidery Design, they were sewn on a machine that was driven by a paper tape. The design was punched into the paper tape, with tiny punch holes representing individual stitches in the design. These paper tapes were necessarily long enough and had diameters of 18 to 24â€™â€™ when coiled up. Till date the same expression is being used to mean digitizing a design.

We at Omkarpromos.com are well equipped with the expertise of accomplished Embroidery Digitizer to meet your requirements. Our professional custom made designs follows latest embroidery digitizing technologies to provide you with best services.
