So, youâ€™ve finally found â€œthe one.â€• Congratulations! This is, indeed, a very exciting time, and on should be celebrated with splendor and sparkle. Three stone engagement rings are the perfect way to show her just how rare and beautiful you believe your love to be.

Good Things Come in Threes

They say that good things come in threes, so why not carry this expression forward into a modern twist on the classic symbol of love and devotion between two people with the intent to share their lives together? Three stone engagement rings utilize the classic diamond solitaire as a center stone, while the addition of diamond accents â€“ one on either side â€“ bring a whole new level of elegance and shine to this timeless token of commitment to the one you love. Wedding and Engagement Rings also allow for a certain amount of creativity and sentimentality to be expressed through the selection of the accent stones.

Creative Options in Three Stone Engagement Rings

As diamonds are by far the most classic and traditional choice, three stone engagement rings give you a bit of opportunity for creative expression or an added sentimental gesture. There are a couple of different ways you might decide to employ your creativity in designing your own engagement rings as a truly one-of-a-kind expression of your love.

Diamond Solitaire with Gemstone Accents

The most popular option in gemstone rings is, of course, that of a diamond solitaire with diamond accents. But if you want to put an original twist on this classic design, consider using alternate gemstones, such as rubies, sapphires or emeralds as the accent stones. This selection can be determined simply based upon her personal taste, or you could add a subtle touch of meaning to the overall design of wedding rings by incorporating your birthstones as accents to the diamond solitaire. This is just one example. The point is that a creative touch of personalization in your accent stone selection can have a big impact on the sentimental qualities of this very special piece of jewelry.

Center Gemstone with Diamond Accents

Conversely, you might decide to veer from the traditional diamond solitaire in favor of diamond accents surrounding an alternate type of center gemstone. Again, rubies, sapphires and emeralds are popular choices, but any semi-precious gemstone with sentimental value works just as well. Regardless of the center stoneâ€™s cut and size, the effect of diamond accents in engagement rings is highly complementary, bringing out a solitaires best and most beautiful qualities.

Three stone engagement rings, due to their popularity as a breathtaking option in bridal jewelry, are relatively easy to find. But if you want to add a creative touch like those weâ€™ve just mentioned, consider designing your own ring. Many jewelry retailers now offer this option, allowing you to create a one-of-a-kind ring thatâ€™s uniquely representative of your once-in-a-lifetime love.
