Article published on December 23rd 2011 | Shopping

With reference to t-shirts, size is very important, an ill-fitting shirt looks awful, but a well-fitted shirt should have you turning heads wherever you go. One of the problems we have regarding sizing with men's t-shirts is that many men emulate their fathers, and in previous generations, men were less concerned with fashion, but more so with comfort, they tended to wear baggy because it felt comfy.

There are many popular men's t-shirt designs, but in order to be truly fashionable, you should own at least one retro style t-shirt. These cheap t shirts are fantastically versatile, suiting many styles of clothing - although you should only wear such t-shirts in a casual setting. Try to select a retro design that reflects your personality, for instance, if you love rock music, then the Rolling Stone motive style tees would be perfect.

A blank t shirts fits well when if it sticks the body gently, there should be a gap of between 3mm and 7mm between the skin and material, and no more and no less. It is vitally important that a little extra money be paid to ensure that the t-shirt is of a high quality, this way, shrinkage does not occur, which would clearly damage the fit, and always follow the washing instructions on the label.

Color tends to be a big problem for men, particularly concerning fashion. In part, this is because a large proportion of men - far more than women - are actually color-blind. If you are such a person, then seek the help of others to help you decide upon color, as colors that appear harmonious to you, may appear to clash to people who can see the whole color spectrum. In terms of colors that match, the neutral colors tend to go with everything. Neutral colors are white, grey, black, brown, and cream.
