Article published on July 3rd 2012 | Shopping

Since the Victorian Ages, choker made of ribbons play a very important role in the female jewellery items. It emphasized the elegance and the beauty of a womanâ€™s neck. Not only did it emphasize but it served as a contrast between the collars of the dress and the neckline. Even today choker continues to mesmerize people. A large variety of choker are available in the market that are made up of gold, silver and other precious metals, but the importance of satin ribbon choker still remains. Making choker with satin ribbon is easy.

The things that you would require to make it are: scissors, satin ribbons, marker, beads, fine string and mirror. Once you have arranged all these materials follow these steps and you would be able to make a nice, dashing choker for yourself.

â€¢ Buy ribbon in contrast to the various colours of dresses you have. You can choose between similar colours to something that contrasts the dress well. For example a yellow dress can have a yellow or blue choker.

â€¢ Measure the ribbon as per the size of your neck. Make sure the lace is exactly of your neck circumference with one inch of extra bit left on either end. Cut the ribbon accordingly.

â€¢ Attach the fine thread with the help of the scissors at both the ends of the lace. Make sure it is connected tightly so that a knot can be made.

â€¢ Now try to chocker on by tying both the ends on your neck, if the size fits, then decorate it with beads or ribbon flowers etc. If the size doesnâ€™t fit alter it by cutting the extra ribbon.

Your choker is ready to be used in any themed or un-themed party and make you look and feel gorgeous.
