# Kids Bathroom Decor â€“ Turn Bathing for Your Kid a Fun Sy

Santosh Shukla

Article published on April 4th 2012 | Shopping

If your kids are lucky enough that they have separate bathrooms for them, then you can add some more sugar to their happiness by lots of options available for the kids bath decor.

The very first option available is to downsize the kids bathroom to their level, put in lower sinks, childish decor & a soft flooring. But, on the other hand, there is one disadvantage if you opt this option that, you are supposed to remodel your kids bathroom within a couple of years as your kids grow up.

The next option available is that you keep adult size fixtures & make the decor look very pleasing to your kids. Along with this, another thing is the wall paint which is a quick & easy thing to do, and it possess the ability to change the picture of the kids bathroom. If your children are old enough, then you should go with their favourite colours. But itâ€™s not always possible to pick the colours which your kids like, therefore itâ€™s important that you find your childrenâ€™s liking and disliking before taking any decision. Keep in mind, walls can be repainted again. Just the once the walls are painted, you can simply make use of wall decals to enter a particular theme. Finally, adding up a small number of accessories such as nursery rug, toothbrush holder, towels according to the theme & your kids bathroom decor will be finished.

Applying themes to the kids bathroom can be very good option but these themes vary by age groups accordingly  The younger children will be very happy with any of their favourite movie characters and you will find that all are available in stores and on line. For girls, Disney princesses with variations of pinks, blues, lavender will be preferred and for boys, sports & car themes are always preferred.

If you have a boy & a girl both, then they will possibly settle to a neutral theme. Making use of bright colourful splashes go well for both girls & boys. For instance, you can apply a Frisbee theme that offers a full line of accessories accompanied by easy bright colours. These type of themes are generally extremely appealing as well as modern. You can find them in many different colour models.

The main thing to be kept in mind that you are not so much focused towards the kids bathroom decorations while ignoring the safety of your kids. Always prefer round corners furniture, plastic accessories & take care they canâ€™t be affected by the hot water.
