## Large Rugs â€“ Know the Proper Maintenance Techniques

by Julia Roger

Article published on May 2nd 2012 | Shopping

It is interesting to know many facts while you shop for rugs. You need to go through a wide range of different variants before picking the most likeable option. Covering the interior floors of your home will help in creating a magical effect in the overall dÃ©cor. Entire outlook of the room will change by sampling placing such a floor cover.  However, be careful with the type you purchase. Each type has its own way of maintenance. The pure cattle wool products need to be maintained by a way that is much different from those ones that are prepared from synthetic, artificial fiber.

Cleaning of large rugs may be a hectic task to manage. There are specialized carpet cleaners available who can make matters better for you. In case, someone wants to do the cleaning by their own, then follow the steps. Take a small area and clean it first. Then, focus on another small area and clean it. Likewise, the entire cleaning procedure takes place. For rugs made from cattle wool, using any liquid soaps and detergent powdered solution is strictly prohibited. There is some dry cleansing powder available for this purpose. These need to be used.

If the rug is made of synthetic fiber, then it can be easily washed without affecting the quality. Special brushes are available for rug-dusting purpose. These are used to clear off the feet dirt and to make the rug neat and clean all the time.

One thing needs to be kept in mind: never expose the rug to direct sunlight for prolonged period. This will make the carpet fade away and will look dull. However, you can keep it in partial or direct sunlight for a brief time. Often, blowers are used for drying the large rugs.
