Never Lose Your Spot Again with Personalized Towels by Anna Davis

Article published on July 25th 2012 | Shopping

Have you ever found yourself on one of those sweltering, humid, just-gotta-get-out-of-the-house kind of summer days? If youâ€™re like most people, you headed to the local pool or if youâ€™re lucky, yo made a beeline to the beach. Regardless of your destination, these kinds of sun soaked summer days drive the masses to seek out refreshment in cool waters. When the beach or pool is busy, itâ€™s crucial to seek out and establish a spot. How else do you mark your territory but with your towel?

Unfortunately, there are many other people with the same idea and often similar towels. Though you may have carved out a spot to relax with your family or friends, leaving this spot then returning can be somewhat disorienting. You may confuse your hot pink towel with that of anotherâ€™s. This can be an especially chilling problem after a dip in the water when all you will want is the warm embrace of your towel. How do you solve this problem and make sure your towel is distinguished from the rest?

Custom beach towels can solve this and any other dilemma you may face when at the pool or beach on a particularly crowded day. Personalized towels can include embroidery of your choice or silkscreen to set yours apart from the rest. Custom Towels, for example, can include three lines of embroidery on the towel color of your choice. In addition, they can create silk screened towels in a variety of fonts. You can even upload an image to be included on the towel. Choose from solid colors, tie-dye style, and even stripes. No matter what you choose, your towels will stand out from the crowd, which is perfect for those crowded beach days.

Towels that are customized for each family member will also reduce the number of fights among siblings who may have a shared fondness for a certain towel. Each child (and adult) can have his or her own towel, perhaps customized with their name and in their favorite color. These towels are made of cotton and available in different sizes, another perk for kids! Not only will they have a towel that is specifically made for them, but it will be just their size too!

In addition to custom beach towels, Custom Towels can personalize bedding and pillowcases. Visit www.customtowels.com to view the variety of options available for customization.
