Order Personalized Towels from a Reputable Source by [Anna Davis](#)

Article published on July 25th 2012 | [Shopping](#)

Towels may not appear to be the most exciting subject, but it is made more exhilarating with the introduction of personalized towels. Companies are now offering options to customize towels, bedding, and more so that each product is completely unique. However, some companies rush these jobs and instead of receiving a beautiful, one of a kind product, you receive an unimpressive lump of fabric. Don't waste your money; it's important to find a company that sells quality custom beach towels, blankets, and more.

One such company that sells custom beach towels and more is Custom Towels. This company offers products that can be either silk screened or embroidered with your choice of words or images. Their products are ideal for companies or hotels that must emblazon their name on their products. However, they are also ideal for families or those looking for a personalized gift.

Before ordering with Custom Towels, it is crucial to understand the difference between embroidery and silkscreen so you know what to expect when you receive your package. Embroidery is stitched onto the towel and is ideal for logos or less complex designs. Overly complex designs will not appear as clean and silk screening is recommended for this type of image. Embroidery also takes longer, as it is stitched directly into the towel, while silk screening is quicker because ink is simply pressed onto the towel. Silkscreen towels cost less as they take less time. Before they are created, customers can approve the design of the product.

After you choose embroidery or silkscreen, you can then choose the type of material, the size of the material, the color and the quantity. A minimum order may be required. There are sample packs available for purchase in case you are unsure about your purchase. Try out bath towels, beach towels or hand towels before committing to a design or order. This is ideal for a large business, such as a hotel, that is attempting to find towels for their pool, spa and guest rooms.

Custom Towels has more than 15,000 satisfied customers, including clients like Shell, Xerox, Marriot, and other well known names. They are able to create large orders of towels that can fit any company's needs. Their products are always of the highest quality, which means these products provide a lot of bang for your buck since they are durable and will last longer than others. To view their products and their available services, please visit [www.customtowels.com](http://www.customtowels.com).
