Over Time: the Advancement of Sports Apparel and Casual Clothing for Men by [Lee Dove](#)

Article published on March 12th 2012 | [Shopping](#)

You're a guy, you love golf, and you wish to look attractive. Certainly, that's not a bad thing at all. Conversely, maybe you're curious to learn more information on the several forms of clothing men have put on to play golf throughout the centuries. Like almost any sport, the clothes male golf enthusiasts don are a good reflection of modern mores.

When modern golf was first played in the Scottish Highlands, the men didn't put on kilts. Rather, they supposedly utilized tight short pants attached below the knee, which were supposedly a lot like English-style knee breeches. Some patterns and colors used in the Scottish Highlands at that time are still fashionable, particularly argyle, which generally adorn sweaters and socks.

Imagine that you were living in the late 19th century. You would have likely worn knee-high pants and long sleeved buttoned-up shirts to play golf. These pants were placed into either knee-high boots or colorful, long socks. However, if you look at this turn to be to some degree awkward, thankfully, the 20th century saw men's fashion changed from knickers and argyle socks to polo shirts, Bermuda shorts, collared shirts, and khakis.

Retail stores selling mass-produced clothes were practically not known before the Industrial Revolution. The problem before the mechanized manufacturing was finding a store which not only had a diverse selection of excellent mens sports clothing, but also different sizes too. Even today, finding the right size can be especially challenging if you're, say, taller or bigger compared to ordinary man.

Nowadays, you can find clothing shops and online shops that also sell mens sports clothing of assorted sizes, starting from small to extra-large. To cater to their customers, some offer clothes with greater waist lines, larger chest sizes, or longer inseams. Some brands such as Cutter & Buck, Tommy Bahama, and Ecko Unltd also recognize this need and tend to cater to such sizes, according to demand.

Should you have a predilection for polo shirts, there is no shortage of them these days. Brands like Ralph Lauren present polo shirts golf lovers like in various sizes, colors, materials, and patterns. Others even combine state-of-the-art manufacturing methods with the finest materials for a seamless finish. With this, you can walk with confidence from the clubhouse to the course together with your peers.

Men's casual fashion and sports apparel have definitely progressed massively from those uncommon clothes from the Scottish highlands. Surprisingly, a few of the brands that are popular today basically commenced hundreds of years ago as custom tailors. Many years of progress and adherence to excellent standards helps to ensure that the mens sports apparel on offer these days are top quality wardrobe investments that will not fail.
