Article published on March 14th 2012 | Shopping

Smoking tobacco is gaining popularity in the west, leading to an ever increasing demand for smoking accessories among people in western countries. Among a huge variety of functional smoking pipes, glass bubblers produce consistent demand from smokers, for good reasons.

The structure and functioning of glass bubblers

The structure of a glass bubbler is much similar to that of a small-sized bong. Bubblers feature a lean stem that goes down its entire length and joins a round glass pot or a bowl. This bowl resembles a bubble, hence the given name. The equipment also features a thin opening for the smoke to flow out.

Glass bubblers also function similarly to glass pipes. The main dissimilarity between the two is that the glass bubblers contains minor chambers when compared to regular glass pipes. The rising smoke passes through the water which acts as a nice cooling agent. When you inhale the smoke you will find that it is cooler and smoother, giving a wonderful smoking experience. If you want something that bridge the gap between a glass pipe and a bong, a glassbubbler is the best choice.

Advantages of using a glass bubbler

The transparency of most glass bubblers makes smoking a fun experience. While inhaling, you can see the bubbles being created in the water and the flowing smoke. Since the water cools down the smoke, you will be able to achieve a nice and pleasurable experience. The user will get much larger hits of smoke because of the size of the chamber that builds up the smoke while the user is inhaling.

Glass bubblers can be compact, portable and easy to handle. The user can easily handle the tool with one hand. There are also bubblers available that are larger, more ornate, and make great pieces to show off at home.Glass bubblers are usually made of thick Pyrex glass, making them more durable and rugged to stand the test of time.

Glass bubblers are available in a variety of designs and shapes. You can even customize these tools to suit your taste and need. The transparency of the bubbler gives an interesting visual appeal. You can choose from among a range of creative designs to reflect your personality. Glass bubblers are also easier to clean when compared to conventional hookahs.

Multi-chambered bubblers and Sherlock style bubblers are in much demand. You can get models that are made to resemble dragons, swans, angels, etc. Before buying a glass bubbler, it is advisable to search online to get a better understanding of various designs and varieties that are on the ever-growing market.

By providing a classy and fun, and functional option of smoking, glass bubblers are a great way to enhance your smoking experience.
