Present Your Lady with the Perfect Preset Engagement Ring by [Aiden William](#)

Article published on May 28th 2012 | [Shopping](#)

You have fallen in love with the most wonderful woman in the world. You are ready to pop the question. All that is left to do is pick out the perfect ring that she will wear when she says "Yes." The picking out of that ring can sometimes be an overwhelming experience. The way to make it a little easier is for you to take a look at some preset engagement rings.

Preset engagement rings are the ones you find on display at the jewelry stores. All you need to do is talk to the jeweler about the cut, clarity, color and size of the diamond you want in the ring. Decide if you want yellow or white gold or perhaps platinum. Once you make these decisions, you will find that the diamond rings New Hampshire provides you will be exceptional. You may want to consider three stone engagement rings. These are called semi-mount rings. They have one larger diamond in the center of the setting and a smaller diamond on each side of the one mounted in the center. Once you have decided on your budget, you can have diamonds that fill that budget in three stone rings.

Before you go shopping for your preset engagement rings, it wouldn't be a bad idea to educate yourself on the terminology used with diamonds and the various kinds of ring settings. A good reputable jeweler will be willing to talk to you about that. If you prefer, you can go online and do your research. It is always a good idea to know why one ring with the same size diamond cost more than another ring. The more you can demystify the process you are about to start, the more likely you will find the exact perfect ring to go on your lady's left hand. Most of the time couples in love will "accidentally" wander through jewelry stores to "just take a peek" at wedding sets. This way the lady can point out which rings look just like the ring she hopes to wear "someday" when she gets married. This is the way lots of men get great ideas on which wedding rings to get.

Many men aren't aware that there are even more unique and exotic choices for the central diamond, especially in the area of fancy colored diamonds. Everyone knows about white or colorless diamonds, but did you ever see the breathtaking yellow diamond when set in an engagement ring? The depth of color and precise color is a challenge to pick from. If you have a lady that really prefers to wear things like few or no others wear, then you may want to ask about a pink diamond, or what about chocolate preset diamond rings. You are not limited to having an engagement ring that is just like everyone else's. You can make the one you pick really stand out.
