Rocky Horrors - Masterpieces in Design and Quality by Lenie Smith

Article published on July 10th 2012 | Shopping

Here at Rocky Horrors they always try to provide not just gothic clothing, but also a real experience and a community spirited approach when it comes to shopping. You have to keep in mind that they have been in this industry for many years, so it is also for sure that they already know all the ranges inside out and could possibly help you to find exactly what you are looking for. They also stock a large range of goth as well as rock and punk footwear from Mad Fish, Sancho and Doc Martens and the massive range of alternative boots from New Rock and their fabulous range of fetish boots from Nitelife.

New Rock boots and shoes actually shouts individuality. Tough, expertly constructed and with unique design touches, New Rocks have truly a real attitude. The range of footwear from New Rock only use top quality materials and although they have hard wearing exteriors fit just like a glove, which gives day-long comfort. With highly decorated and extremely fashionable exterior designs, the range of New Rock alternative boots are also immediately identifiable to those 'in the know' and could possibly be yours with free European delivery directly to your door. Rocky Horrors have a wide range of New Rocks in stock in order for you to try, which includes a great range of alternative and gothic boots and more.

Moreover, Cowboy boots were also designed with a pointed toe in order to allow easy insertion into a western style riding stirrup, while the smooth sole helps slip in and out. The high heel was actually developed in order to stop the foot from slipping too far into the stirrup, which could be a life threatening even if a horse were to bolt as the boot, and then the rider who is wearing it would also be dragged against sharp rocks at high speeds. The traditional cowboy boot has a long and full leather shoulder which was actually developed to not just only protect the leg from chafing against the horse, but also to protect against harsh terrain, scorpions and more.

Another, Dr Martens early boots were available in two colours, which are the black and red, that is also about as exciting as your choice of these boots came, however soon the demand will grow for more colour and the choice of style, so now they have a massive variety of colours as well as designs, which includes Dr Martens boots for women, with embossed finishes and fluorescent colours. The classic Dr Martens touches are actually still there, but nowadays you can now possibly get all the choice that you need in a boot which is also over comfortable, still with the famous 'Air Wair' sole.
