Save Money Smoke E Cigarettes by Haley Oliver

Article published on December 6th 2011 | Shopping

The e cigarette user saves money - much more than someone who lights up old-fashioned cigarettes. Before the e cigarette became an option, a smoker didnâ€™t have a choice. Every single smoking break could be measured in dollars lost, and the weekly tally could add up to a devastating amount. Now, with e cig vapor assortments offering the best of the smoking experience without the detrimental tar or toxic chemicals, there seems to be no reason not to switch over to the state-of-the-art smoking experience.

Think of e cigarettes as refillable cartridges; thatâ€™s really what they are. You simply purchase a cigarette-like device that holds liquid, and youâ€™re on your way. That description vastly simplifies the e cigarette but offers the gist of the product. Youâ€™ll never buy another traditional cigarette; you wonâ€™t need to. Instead, you will be free to sample the wide variety of vapors available for your cutting edge e cigarette. Youâ€™ll never need to walk inside a convenience store just to buy another pack.

Rolling old-fashioned cigarettes is a thing of the past, and buying packs of cigarettes soon will be as well. People worldwide are embracing the revolutionary e cigarette as the â€˜new way to smoke,â€™ and they are raving about everything from the cost-effectiveness to the custom vapor combinations. Try it yourself to see what everyone is talking about, and youâ€™ll undoubtedly be a quick convert.

Treat your e cigarette like an after dinner treat by selecting sweet dessert vapors like chocolate and caramel. Add some complexity with notes of hazelnut or inject a touch of the coffee shop with a strong jolt of espresso vapor. Or just keep the e cigarette experience as close to conventional smoking as possible and stock your shelves with tobacco or odorless flavors. Itâ€™s up to you. The e cigarette can completely change the way you smoke or it can mimic it closely. Think about what you want to achieve from your smoking experience and go from there.

Whether you choose to enjoy a new flavored vapor or not, your wallet will definitely thank you for choosing to smoke e cigarettes instead of buying pack after pack at the convenience store. Truly, if you smoke conventional cigarettes, you may as well stick a lighter underneath your cash and watch it burn. Refill your e cigarette for much less than the cost of another cigarette, and enjoy the vaping experience longer.

Thereâ€™s no reason why you shouldnâ€™t try e cigarettes if you are an avid smoker. The money issue alone is a huge reason to choose e cigs. Your wallet will thank you â€“ and so will your lungs. E cigarettes do not contain tar or toxic chemicals as part of their vapor formulas. Instead, youâ€™ll enjoy a much cleaner smoke. Peace of mind without breaking the bank? -Itâ€™s a win-win.
