Getting ready for the springtime requires a lot of effort. The biggest task is doing your spring cleaning around the house. Spring cleaning is such a huge task because you have actually spent so much time in the house all winter. And with cold weather setting in for month after month, you can rarely even take the opportunity to open the windows to let some fresh air in.

Spring is a time of rebirth and renewal. Along with cleaning the house up, you also have to put away your winter clothes and get out your clothing for the summertime.

The difference between winter and summer clothes goes far beyond just long sleeves as compared to short sleeves. Clothing also is much brighter and more colorful in the summertime. The palate of colors in your look will quickly go from a few muted earth tones to all the colors of the rainbow as winter evolves into spring.

The Versatility of Sterling Silver

As your wardrobe changes with the seasons, so will the items of jewelry that you choose. During the winter months you probably donâ€™t find yourself wearing bracelets too often. This is due largely to the fact that under giant sweaters and coats you will probably never see them!

With the warming air, many women will begin to dig out their old bracelets again to show off. The most popular material used in favorite spring bracelets is more often than not sterling silver.

Sterling silver is a great choice for the warm months because it is a neutral color that goes with everything. Remember all those colorful clothes you dug out when putting away your winter coats? Well, each and every one of them should match with the base tones of a sterling silver bracelet (matching any gemstones or other coloring is up to you!). These sterling silver bracelets are great choices for fun in the sun this spring.
