Stop Ironing Your Dress Shirts when You Can Get an Excellent Alternative by [Alyssa Kelsey](#)

Article published on December 10th 2011 | [Shopping](#)

Quite simply, Collar Stays are a very minute detail that will add an exemplary amount of style and professionalism to you, regardless of your profession. A collar on your shirt directly frames your face, so you are going to want to provide the most detail you can in the most positive manner possible. In order to do that, a crisp and flat collar on your shirt is paramount to the impression that you will make on everyone you meet. To ensure that you have a neat and crisp collar, instead of ironing, learn about the advantages of high quality collar stays.

The primary purpose of collar stays is in order to keep your collar in place at all times by adding a bit of weight and straightening a very light and flexible bit of fabric. As you already know, shirts that have collar stays that have been sewn in are generally made from a thin plastic, which are virtually impossible to iron, keep straight and not damage in the wash machine. Since you have likely learned about these types of shirts, you only purchase the higher quality shirts that have the unsewn slit for insertion of collar stays. Many dress shirt manufacturers will not sew in a pocket underneath your collar in order to allow you to insert collar stays. Therefore, you are going to want to make sure that those pockets are available on your next purchase.

In addition, just like the shirts that you purchase, every collar is different. This means, you are going to want a variety of collar stays for length, width, material and shape. It is not hard to select the right collar stays, and some companies will offer you an exemplary variety of collar stays in lengths to suit any shirt. These lengths can be from 2 to 3 inches, with varying sizes in between, in order to fit every shirt that you have in your closet. You can choose from a variety of materials for your collar stays, and are solely based on personal preference. Metal collar stays are extremely popular, and always keep your shirts crisp and your collars lying correctly. You can purchase metal collar stays in white vinyl, brushed and polished titanium, stainless steel or 24-karat gold plated brass.

Most of the collar stays you can purchase, will come with a complete set of collar stays, and also include an organizer that is wall-mounted so you can keep your collar stays safe and in one place. This way, you do not have to worry about losing your collar stays by storing them in a small box or in a drawer. You can also have your collar stays monogrammed, to give them a professional, personal look and feel. Eliminate the need for ironing and fighting with unruly collars, when you can purchase a spectacular array of collar stays in a variety of materials, all at a great price. Quickly and easily keep your shirts crisp, clean and look professional at all times with metal collar stays.
