Article published on July 5th 2012 | Shopping

Just as much other technological advancement over the course of time due to rapid development in science, intercom systems have also undergone sea changes, since its first appearance in the market. Earlier, they were used primarily in the building apartments and big offices and companies, but now they are even used in individual houses. These systems have now become more affordable and their unique features suit the needs and requirements of residential homes.

The incorporation of video to these intercom systems is perhaps the latest development in this field. With this, the person at the door can be seen from inside the house, without actually seeing him. Video intercom system is now an extremely popular option among the middle class families as well. The installation of the third eye has several advantages:

â€¢ The primary advantage and benefit of these systems is that they add additional security to your house. The entry of your house and even other parts can be monitored without letting people know about it. Even kids can now recognize the person before opening the doors.

â€¢ With home intercom systems, you can now monitor the rooms of your house as well, and also check their audio and video. You can even use your intercom system to play music and take advantage of the wide audio. There are many additional features like this and one should check out before purchasing, the different features of the intercom system.

â€¢ A major advantage of installing a video intercom system is that they can be installed anywhere â€“ entry doors or property gates. The system of installation is easy and they have the option of automated entry or remote entry.

Thus, when crime rates and increasing each day, installing intercom systems can offer you more security and respite from criminal intrusion and can protect your family, property, and loved ones.
