The Kinds of Drywall Tools in Use by Julia Roger

Article published on January 27th 2012 | Shopping

Oftentimes we need to create partition in rooms, either at our residence or in the office. However, instead of going for real construction methods one can always go for the drywall options. These closely resemble the common partition boards made of woods but differ in their structure. These are easy to install and are appropriate of making false ceilings and partition walls.

The various kinds of drywall tools include taping tools, utility knife, saw, circle cutters, lifts, jacks and others. The complete kit is required for appropriate sizing and finishing. The types of drywall tools and their functionality are enlisted below:

â€¢ A utility knife is used for different kinds of cuttings and markings. It is the first item of the drywall kit.

â€¢ Drywall T Square is a tool which is required for drawing lines before cutting. It also has measurement marks in it, which makes it easier to draw lines and locate places were the cutting needs to be done.

â€¢ Various kinds of saws are there in the drywall tool kit, which include drywall saw, keyhole saw and power jig saw. A drywall saw is like a hand saw which is used for cutting drywall sheets; a keyhole saw is used for making incisions for the placement of electrical box or switchboards

â€¢ A drywall lift is used to hold up the board while one fixes it with the nails and other devices. It comes very useful when one fits a drywall board as a false ceiling.

The other minor tools include a circle cutter, drywall router, rasp, drywall jacks and taping knife. Among these, a drywall jack is used for providing support when the drywall board is placed as a false ceiling. The others are used for cutting edges.

Thus, one must ensure that he should possess the tool kit before commencing any drywall work for better finishing.
