Tips for Buying Laptop Notebooks

by Jon Smith

Article published on January 4th 2012 | Shopping

A laptop notebook is a kind of portable personal computer which combines most of the features of desktop computer such as display, keyboard, a touch pad and speakers into a single unit. It is powered by mains electricity through AC adapter and rechargeable battery. The freedom and features available with laptops are fostering more and more people to buy laptop instead of desktop computers. With the growing demand of laptops all over the world, the world's best manufacturers are coming up with well equipped lap tops available in all budgets. With laptop notebooks available in every brand, first time buyers often get confused in making a right choice. By exploring the following features, you can wisely choose latest notebook to suit your needs.

? If you are buying laptop notebook for great responsiveness and realism, it is better to invest in laptop with Intel's dual core processor. Designed for HD multimedia, Intel's dual-core processors allow you to work faster than laptops with single core processor. Such feature allows users for fast and convenient multitasking.

? System memory is used for running programs, reading documents, and storing internet information as and when you view it. If you are buying a laptop notebook for simple day to day tasks such as watching movies, net-surfing social networking etc. then 2 GB RAM is sufficient for you. However, if you need more power and speed for opening heavy files and multitasking, you can go for 3GB or 4 GB RAM options. For better choice, consider 2GB for minimum requirement, 4GB for optimal and 8GB for maximum.

? A laptop can either have dedicated or integrated graphics. Dedicated video sets are typically from NVidia and ATI/AMD, whereas integrated graphics are generally from Intel. If you are looking for laptop notebooks for normal use, such as playing some videos or games, you need at least 256 MB discrete graphic card to play most games but at low resolution. The better option is to buy laptop notebook with dedicated 512 MB graphic card reader.

? You should also consider laptop in terms of weight and size dimensions. If you are into profession in which you travel very often, it will be convenient to choose laptop notebook with light weight and small size. While considering the weight of a laptop you should also consider weight of the AC adapter, the extra batteries and any external cables.

? Many laptops come with come with two or more USB 2.0 ports which can handle multiple USB devices.

? Check your laptop for Ethernet LAN connection, integrated wireless and blue tooth connectivity. Its Blue tooth connectivity should allow transferring data to other devices for up to 30 feet.

? Generally, every latest notebook comes with 60GB hard-disk drives. For normal routine work, you can opt for anything between 200 GB to 500 GB.

? For better performance, it is recommended to look for laptop notebooks with a single Lithium-ion primary battery which should last for at least two years. If you are spending much time on flights or trains, it is better to buy some extra batteries.

? A prudent buyer should always look for warranty, return policy and services like on site servicing. Also, buying a laptop notebook from a popular brand allows you to trust it more in terms of quality and durability.

It is advisable to make a list of all your requirements prior to buying a laptop, so you can buy latest notebook with configuration that best suits your needs and budget.
