Unique image puzzles by Jasmine Smith

Article published on December 22nd 2011 | Shopping

When you are planning to make a photo puzzle, no matter what the purpose is, always try to build something which is unparalleled, unique since that would win the appreciation of the gift recipient forever. Now can you ensure that the gift is different and better than the rest? Well you can do that by going for a different type of a cut pattern, unique kind of material and selecting the 3D or at least 2D style. Even if your image puzzle is of hand cut type, it can be unique in nature if you manage to select some unique designs and styles which havenâ€™t been tried before.

When you make a puzzle, do not go for the designs of the mass produced puzzles since they do not come in limited edition as a result of which they are not unique. Therefore it is always more preferable to go for something which comes in a limited or at least has a special image or is limited edition numbers. You can take the design suggestions from these limited versions and expect to earn good amount of appreciation for doing so. You can get hold of these designs by searching the internet, but it would be best to go for your own creativity for the best results.

You can go for the hand designing when it comes to making of image puzzles since hand designing would make the puzzle look tricky and interesting. You can go for either the interlocking or the non-interlocking depending on your choice and requirement. When you make your own photo you should offer some individuality to it, otherwise it would end up looking quite boring and common place. A great way of doing so is adding some photos to it and making a puzzle with photo.

If you are gifting the photo to someone, obviously you would not be able to use your own photos. In that case you can ask for some personal photos of the gift recipient and make the puzzle. This would be a unique gift and would also touch the heart of the person concerned. Your next concern should be the standard of the photo puzzle. You cannot afford to build a highly complicated puzzle for someone too young, again a simple puzzle for a grown up can be too uninteresting for the person. So, keep the age of the gift recipient in your mind before you make your own make your own photo.

In order to make the puzzles highly interesting to play, go for a colorful design with bright colors. Repetitive pattern and uninteresting designs can make your puzzle seem very monotonous and similar to most other puzzles around. On the contrary if you manage to build something interesting and challenging, things can be a lot better. Puzzles from photos can be a little challenging to build, but if you pay a little attention to the process, things can be cakewalk! So, what are you waiting for? Build a unique photo puzzle to bring a smile to a loved oneâ€™s face.
