The Different Mediums of Psychic Reading by Amanda Williams

Article published on May 11th 2012 | Society

In her several years of experience practicing as a psychic reader, Psychic Amanda has encountered several interesting people. While some are looking for advice on their career, there are others who are looking for solutions even without knowing that the answer to their problems lies in their past. For instance, a young lady who wanted to join college, but just couldnâ€™t shake off the feeling of failure came to the Spiritualists to seek help. She could visualize an old lady who was full of jealousy and used demeaning words when speaking to a young girl. Susan acknowledged this lady to be her mother who often insulted her ever since she was a child. It was these words that were deep seated in Susanâ€™s subconscious mind and prevented her from joining college.

Every conscious action of man is a manifestation of thoughts that have established themselves in our subconscious mind. Such a deep seated memory of things lies within each one of us; itâ€™s just that we are so involved in our everyday experiences that we do not pay attention to them. This unconscious mind was the premise of several people like Sigmund Freud and Carl Jung. There are several ways through which one can tap the unconscious mind. This is usually done through psychic reading, tarot card reading, palm reading, dream analyzing, aura reading, etc. Some popular methods include:

Tarot Card Reading: This involves the use of tarot cards to suggest solutions to problems. A tarot card consists of a stack 78 cards, divided into two sections- major arcana and minor arcana. A seeker who needs solutions to his problems shuffles these cards and cuts them. The Reader then arranges these cards in a pattern called spread. Just as every card has its meaning, the position of the card in the spread also has its own meaning. It is the job of the reader to combine these two and then suggest solutions to the seeker. While the cards are open to interpretation, and it is ideally possible to make several stories using these figures in the cards, the Reader chooses only one interpretation and this is the one that is most suited for the seeker. This is where the Reader acts as a medium in interpreting the subconscious thought of the person.

Palm Reading: Palmistry is the oldest of all occult arts. It is said that the lines in your hand can predict your capabilities, your character and even your personality.

It is the job of psychic readers like Psychic Amanda to use these mediums to understand peopleâ€™s problems and suggest solutions. Psychics like Amanda are god gifted and bestowed with an ability to connect with the sublime thoughts around people. She has been doing this for more than 19 years- ever since she was eight. Today Amanda is a reputed name among psychics in Toronto and among other services specializes in psychic reading, crystal ball, tarot cards, palm readings, energy blocks, picture readings etc.
