The issue of crime related to Illegal Immigrants is more expensive than thought of. Manhattan Institute Scholar Heather MacDonald reports, out of all the warrants of homicide about 95% are targeted at illegal aliens. In another report it is revealed that 75% of the fugitive felony warrants are against them. The scholar has also reported that 60% of Hispanic gangs in California are comprised by the illegal entities. They are supposedly involved in assaults, robberies and other unsocial acts.

Within a period of 7 years from 1999 to 2006 more than 900,000 offences were committed by the illegal immigrants all over the US.

The nation has to bear a lot of expenditure in terms of money due to these miscreants. Apart from the social disturbance the burden is monetary too.

Centre for Immigration Studies indicate that in 2002 the federal government had to bear an expenditure of $26billion. Out of this huge amount $16 billion was paid in Federal taxes and rest of it was represented as fiscal deficit every year. The deficit impacted the other aids like Medicaid, medical treatment, food assistance programs and others.

These immigrants arriving and staying here are more of a burden due to their â€œless of education propertyâ€•. Most of them have not even cleared their high schools exams. Hence they are no good for making any contribution to the country even when they are legally caught and imprisoned.

The presence and existence of such people adds the tax burden to the citizens. Every year the tax payers are bearing a cost of $100,000.

There are examples when these illegal immigrants have been used and exploited by the natives. Some companies hire them at a rate of $8 per hour whereas the actual wage is $16 per hour.

In spite of so many repercussions the bill to deal with illegal immigration is not implemented. Voters are their leaders are not a part of legislation making process. It is somebody else who is looking into the whole affair and has nothing got do with the cost.

The reality of illegal immigration is that it makes the pocket of the taxpayers quite difficult as they have to pay for no constructive job done. They are doing it because they are supposed to do it.

Some people are purposefully quite on the issue because they are making huge profits out of this venture. All the big prison companies make huge profits out of these illegal immigrants. They continue to enjoy the gains as the law locks up more and more illegal immigrants every day.

The tax payers realise that their burden is growing heavier and heavier but they have very little option as they cannot play any role in preparation and implementation of the law and legislation. Things are handled by the bunch of people who do not seem to be affected by the tax burden due to illegal immigrants.
