Article published on July 19th 2012 | Software

Microsoft Office 2013, codenamed Office 15 is the next generation suite for Microsoft's famous "Office" applications Microsoft seems to be on a mission to revamp its products this year. After the complete overhauling of its Windows operating system and server OS, Microsoft has now released a Metro based Office suite with new and improved features. In this post, it will introduce you 3 key features of the new MS Office 2013.

Cloud Service

The incorporation of a Cloud features for MS Office 2013 is really what defined the MS Office 2013 into becoming a "service". Through this, people would be able to access, edit and save documents in any type of Windows-based device from any type of location. Microsoft is actually offering MS Office 2013 users to purchase MS Office through subscription. Microsoft offers new Office 264 subcription services which includes Home Premium with 20GB of SkyDrive storage for families and consumers, Small Business Premium with email, conferencing and web site tools, and ProPlus for enterprise users. This subscription could be used in either PCs or Mac.

Touch Controls

Microsoft also has plans to integrate MS Office 2013 in tablets which is the reason why MS Office 2013 is already integrating touch controls. Through this feature, different functions of the MS Office 2013 can easily be changed and accessed through touch controls. As reported before, Microsoft is also planning to release their own "Surface" tablets and integrating touch controls would help tablet users in utilising MS Office for their computing needs. There is also a feature for utilising stylus which would help users especially in terms of their reporting and presentation needs.

Utilising Social Media

Microsoft has embraced the fact that people are now living in the social media world through integrating social media in MS Office 2013. A new version of Sharepoint would be updated in MS Office 2013 and it would include newsfeeds and sharing tools that would be like Facebook or Google Plus. Skype calls, Lync communications and online meeting services, and Yammer would also be utilised in MS Office 2013. This would mean an easier way of sharing and exchanging of information and communicating.

After MS Office 2013 released, we will also face the problem that we did when we updated to MS Office 2013 that how to recover Word password or how to deal with your Excel password recovery if you forgot your MS documents password or Excel worksheet password. For file or privacy safety, we would like to put a password to keep the data or confidencial let out. We still do not know whether MS Office 2013 can easily solve the issue which is expected to be officially released by October, 2012.
