# 3 Ways to Free Download YouTube Videos on Mac by Janet Fitch

Article published on April 19th 2012 | Software

YouTube.com now is one of the greatest community which allows users to freely upload, view, share and comment video clips online. Since its launch in 2005, it quickly became the most talked about and frequented websites in existence. More and more YouTube fans like me spend endlessly day on looking for the newest and funniest video clips uploaded on YouTube. When we find a great video, we will like to save it so that we can enjoy without any network. So, how can I save YouTube video on Mac? How can I download YouTube video for apple devices? Don't worry, here are 3 best free ways to download YouTube video easily.

KeepVid

Keepvid.com is a website which can download streaming videos for you freely. To download a video from YouTube you just need to follow these 3 easy steps: first, copy-and-paste a YouTube video URL into the form above and hit "Download"; second, if it's your first-time, a warning box may pop-up - just select "Run" to continue; at last, a list of download links will appear, right-click on the format you want and select "Save As..." to start your download.

Easy YouTube video Downloader

If you are a firefox user, Easy YouTube Video Downloader is the fastest YouTube downloader add-on available online. Download YouTube videos as 128kb MP3s up to 30x faster than any of the competing downloaders. It offers the highest sound quality available and our free YouTube downloader works directly within page. It download and convert YouTube videos as high quality M4A, AAC, MP3, MP4, FLV, and MPEG files. With Best Video Downloader, it's never been easier to download from YouTube.

MediAvatar Free YouTube Download Mac

Just like the name FREE YOUTUBE DOWNLOAD, it allows you to download YouTube videos Mac directly from YouTube to your PC for FREE. This FREE YouTube downloader is one of the most easy-to-use YouTube downloader on the market at high speed with flexible downloading options. Drag & drop the YouTube URL directly to the YouTube downloader, download directly from the right-click menu on your web browser, or even with the built-in browser in the Mac YouTube download itself.
