Acer Aspire Z5771-UR31P by Theodore Sumrall

Article published on April 20th 2012 | Software

Acer Aspire Z5771-UR31P offers strong features and performance, completely justifying its price. The desktops also include HDMI input and output jacks. However, its uninspired touch software and design could disappoint the customers.

This mainstream desktop isnâ€™t the excellent all in one 23 inch desktop, but it offers the balanced performance and features for the amount that you have paid for. This desktop has the power to offer a decent performance for anyone who might be looking for basic computer for Home entertainment.

Currently, Acer Aspire Z5771-UR31P is available for $899, which makes it a perfect choice for all in one desktop for fairer price. The chunky touch software and plastic body will disappoint the users, but the desktop comes with 23 inch display screen and also offers a decent performance. Acer Aspire Z5771-UR31Pâ€™s capability of delivering strong performance would justify its price. But if you compare this PC with others, this PC has few notable advantages to offer. If, you purchase the PC based on its look, then Aspire Z5771 is definitely not built for you. However, this desktop has the capability of delivering workaday performance, with sets of solid core feature.

As like in other desktops from Acer that comes with thick bezel, Aspire Z5771 also includes that feature. The desktop is black in color with white trim around it, giving desktop a retro-modern look. Internet explorer support This desktop comes with 23 inch touch support display screen, along with the suite of Touch based software applications. You might find it interesting for few minutes, but after a while you will definitely ignore it.

The Aspire Z5771 comes with installed Embedded 64MB Intel HD Graphics 1000, which helps in delivering the full HD experience. Like any other desktop in this level, Aspire also offers the larger digital data storage capacity of 1TB, which runs with the speed of 5,400 rpm. The desktop also comes with installed Optical drive which supports dual layer DVD burning. For network connection, it has Gigabit Ethernet and 802.11b/g/n wireless technology. The desktop comes with installed Windows 7 Home premium, with 64-bit.

The Acer has not put enough in this desktop to stand in front of others. However, they have wisely included the faster i3 CPU in this desktop instead of slower i5 CPU that has been included in all in one Toshiba DX735-D3201. But if, we look at the Omni 220-1080qd from HP, Omni has lot to offer just for $100 more. But the HPâ€™s Omni lacks the HDMI ports, which are included in Acer Aspire Z5771. Overall, we can say that itâ€™s a decent 23 inch desktop for fairer price.
