All-in-one New iPad video editor for mac on Mac OS X Mountain Lion by [Jessicatian](#)

Article published on March 15th 2012 | [Software](#)

If you get the New iPad with attractive features, would you use it to play videos on your way? If you are trying to enjoy your collected video files with the long anticipated New iPad, you should first ensure that all your video files are able to be accepted by it.

New iPad, which comes with the most advanced Retina display, is definitely the best choice for those who love watching movies. The definition is high enough to make all competitors feel ashamed and feel nervous. The Retina display with 2048*1536 pixel resolution is right a milestone in the display manufacturing.

It is certain that watching movie on high-definition display is a good kind of enjoyment. You can feast your eyes with high quality movies. But just as its predecessor iPad 2, the New iPad can play several video formats such as MP4, MOV, M4V and so on. It is not a long terms to purchase movies from iTunes. So, there is a solution to solve the problem, you just need a New iPad Video Editor for Mac, you will be able to convert various videos download from internet to New iPad formats. Here I would like to recommend iOrgsoft New iPad Video Editor for Mac to you.

iOrgsoft New iPad Video Editor for Mac is a professional software to convert and edit videos. With this software, you can freely convert mkv,vob,avi,wmv,mpg, h.264,dv,etc to mp4, mov, m4v to play on the New iPad. If you like customizing movies, this software can crop video files, trim video clips, split long video into smaller ones, join/merge several video files into single one, adjust brightness, saturation, contrast and so on.

Key Features of New iPad video editor for mac

Broad Format Support

New iPad video editor for mac support pretty much any formats including High-Definition video like AVCHD MTS/M2TS, AVCHD Lite, TS, HD MKV and standard videos including WMV, MP4, AVI, MOV, MPG/MPEG, FLV, and more.

Easy Drag and Drop

Drag your video clips into the timeline and arrange them as you wish. Drag in transitions. Drag in a song from iTunes to create your soundtrack. You'll be amazed with how easy moviemaking can be!

Edit Quickly and Precisely

Split, merge and trim your videos accurately and quickly with advanced timeline in a few simple clicks and easy drag and drop. Remove unwanted frames or restore trimmed frames by dragging the yellow handles.

Useful Video-editing Tools

Provide a list of useful editing tools including crop, rotate, effect, split, merge, trim, so that you can edit your videos however you like: crop the black sides, rotate videos taken with camera held sideways, etc.

Add Background Music

Drag in a song from iTunes to create your movie soundtracks and cut the melodies to the length of your video content. You can easily remove the original video soundtracks and add your own cool background music.
