Article published on January 18th 2012 | Software

Android player for windows is not new today and surprising for Android users. It has already become popular due to its introduction of Android applications by the renowned company Blue Stacks. Recently Blue Stacks have introduced App Player in alpha version and gaining popularity everyday by the android users globally. It can be downloaded easily online. The steps are easy and take hardly few minutes. The software is being downloaded in a fast speed by the game lovers. The latest version of Android player will support both Metro User Interface modes and can be applicable in Windows 8 users globally.

These Apps for windows have already captured a huge global family with its introduction in just few months and a short span of time. Blue Stack has already integrated a whole lot of Android Apps into the latest version of Microsoft OS. It is most effective with Windows 8 users. Blue Stack helps you to run apps on Android in full screen image and fast in Windows as well as tablets. It can be run without any portal as the beta version is soon going to be introduced into the market. This will attract more consumers and users in the market.

With the collaboration of top Personal Computer manufacturers, Blue Stacks is actively pre- loading app player with a fast speed which can be run on Ultra books, notebooks and tablets. It has been declared the only program developer all over the world that can help running mobile applications that are x86 windowed or ARM- based or full screen on tablets and Windows of Personal Computers. Blue Stack makes it easy to use and an added advantage of running in full screen mode. With the introduction of its beta version, Blue Stack is expecting a lot more consumers and users. With a strong financial support and a good stock of capital market, Blue Stack is challenging new versions every time in its press release with new products and comes up with new attractive features. Therefore, Blue Stack and Android player together is gaining a huge market and will become bigger with new inventions everyday and support of its users.
