An effective tutorial of converting MP4 to AVI by Jane Huang

Article published on July 25th 2012 | Software

Converting MP4 to AVI or perhaps converting AVI to MP4 may be hard process without the third-party application. Thereby, if you'd like to convert video file between MP4 and AVI, a decent performance third-party application is expected. Here we work with a MP4 converter for the reason that it can certainly perfectly convert MP4 to AVI and AVI to MP4 as well as maintain the source quality. In addition, this MP4 also gives you some editing characteristics in making the video rather more vivid and exclusive.

Next, just abide by me to implement the conversion. Here, Iâ€™d like take converting MP4 to AVI for instance.

Step 1: down load and install the MP4 converter.

Step 2: add MP4 files

Launch the MP4 converter and click â€œaddâ€• to input the MP4 videos. you can also click â€œfileâ€• on menu to input video folder for batch conversion. Double click the video file for previewing.

Step 3: select output

Simply move to the profile bar and decide AVI as the output format from the common video tab or perhaps directly search AVI in the searching bar. And then click â€œoutputâ€• to choose an output folder.

Step 4: edit the video (optional)

To generate far better output, you are allowed to click the edit icon for editing. Trim the video length simply by setting commence time and stop time, crop the video simply by changing frame size to get rid of extraneous margins, modify contrast, brightness, saturation to generate far better effects, and add watermark to produce the video rather more special and private.

Step 5: settings

Next click â€œsettingsâ€• to adjust audio and video parameters including bite rate, video size, audio and video codec, and so forth.

Step 6: converting MP4 to AVI

Eventually, get started converting MP4 to AVI simply by pressing the convert icon in the main interface.
