First, it support more output format than MacTheRipper:

As we know, MacTheRipper can only help you backup DVD movies to hard drive in VOB format, but Doremisoft DVD Ripper for Mac supports a wide variety of video format like MOV, M4V, MP4, WMV, AVI, ASF, MPG, MPEG-1, MPEG-2, FLV, F4V, 3GP, 3G2, MKV, TS, TRP, VOB, SWF, DV, etc. Besides, lots of video presets for mobiles and devices like iPhone, iPad, iPod, Apple TV, PSP, PS3, Xbox 360, Zune, Archos, etc. are provided.
