Article published on December 30th 2011 | Software

Do not be surprised by the phrase, â€œAndroid for Windowsâ€•. Yes, this has been made a reality by a California based company, BlueStacks. A newborn company, who has not yet completed 1 year, has already captured the heart, mind and Windows too of the global users. An application with the same name has been developed by the company which is a synonym to Android for windows.

The wait is over for those who wanted to play their Angry Birds version of Android on full screen. Now with the installation of BlueStacks in your Windows, you can use all your favorite Android application the same way you used to enjoy. However, one must learn that only Android users can use a version of the software on their PC, You actually need an Android device with you to use the application. It is not a generalized package meant for free download to all.

While playing a game on your Android, full screen was always a hindrance and used to kill the excitement. With the introduction of BlueStacks, widely known as Android for Windows, one can enjoy all the same features on a large screen of PC or laptop. With an advance version, Cloud Connect, one can even play their favorite shooting apps on PC from their mobile.

BlueStacks gets an easy to use icon on the desktop and always runs in full screen mode. It is surprising to see the ease with which mouse and keyboard interacts with Android for windows. One must not forget that BlueStacks, Android for Windows is in its alpha stage and a lot is expected from it. It is not solely designed to run Android on full screen, but to enhance the usability and comfort of the user. With $14 million already rose as financial support from venture capitalist, the company is sure to grow big and present the world with more sound, and attractive features. There is no end to the possibilities that a user can have from a fully developed version of the software and can enrich the personal experience while using the software Android for windows.
