Android: Reigning Supreme in the US by James Andy

Article published on July 11th 2012 | Software

Witnessing a capability medal-winning athlete recapturing lost ground and drawing close to the fore, is a superb and breathtaking sight. Compare the life span of the Android OS to such an athlete, and you will find unexpected similarities. Always touted to be a frontrunner for the best OS site, Android has garnered undying adoration from users and developers alike. Many an Android app development company has made a wealth leveraging the capabilities on offer from this OS.

Rising like a gladiator fending off struggle in the Colosseum, Android has upstaged and astonished more primary OSs on its ascent. A fresh study presentations that Android has made up for lost ground and one time over assembled a firm lead over the Apple iOS. The first quarter of the year looks like to represent Androidâ€™s market share at a whopping 61%. This signifies all the other portable running procedures for instance Apple iOS, RIM and Windows Phone retain a cumulative market share of only 39%. This is many journals for offshore Android development companies as they can organise in earnest for a get higher in the demand for cutting-edge and highly intuitive apps. Smartphone sales are in addition up, accounting for 66% of all handset sales in the US.

Market Share Highlights for Android:

â€¢ Increase in market share after poor break from work season

â€¢ Market share up to 66%

â€¢ Relegated all other smartphone OSs to a total market share of 39%

â€¢ Claims 90% of market share aggregate with Apple iOS

â€¢ Smartphone sale up to 66%
