Asus G74SX-A2 - Core i7-2630QM 2GHz - 17.3-inch TFT is a Massive Gaming Laptop by [Theodore Sumrall](#)

Article published on June 4th 2012 | [Software](#)

The Asus G74SX-A2 is not among the very commonly found laptops but is one those huge gaming laptops that gamers had loved across the world. Asus has a very good reputation of being able to manufacture sturdy gaming laptops. Sometimes they marketed their products themselves whereas sometimes their products were marketed by the "Republic of Gamers"™ brand. That shows their efficiency at being able to create massive laptops for gamers. Though sturdy and strong it does not appear to be something very heavy and huge that other gaming laptops look like. However it is a bit expensive and is quite out of the reach of most costing nearly \$2000.

An Intel Core i7 2.0 GHz processor with 160 GB SSD is a good return for your spending when it is coming with a Nvidia GeForce graphics card of 560M GPU. The RAM is 16GB whereas the Hard disk space is 750GB, both of which are much above normal and is exactly good for a gaming laptop. The high specifications are included in a black box that has a hushed lusterless finish, something that perhaps hides the bulkiness of the laptop.

Ranking much beyond Alienware M18x of Dell and Origin EON17, G74SX-A2 of Asus is good for high to middle level games. This can still be excess for the casual gamers and good for the professional gamers to start with. Display of this brawny laptop measures 17.3 inches diagonally and the height is around two and a half inches. The 16.5 x 12.8 inches Asus G74SX-A2 is almost 10 pounds heavy when no AC adapter is attached but reaches almost 12 pounds when the AC adapter is added. The weight of the laptop makes it a little out of place among the present day light laptops even with large display. However, it is lesser by 3 pounds in front of the Alienware M18x of Dell and is okay to suit gamers'™ needs.

The Asus G74SX-A2 is quite a massive laptop for gaming yet does not appear to be so for being designed into an angular box of black shade. The specifications are quite high-end. The price is the factor that is around 2K, and obviously could have been kept lower. Keeping the good and bad, of Asus G74SX-A2 - Core i7-2630QM 2GHz - 17.3-inch TFT, together it is obviously a good laptop to opt, especially by gamers.
