Avira Antivirus Premium 2012 by Harish Sheel

Article published on February 13th 2012 | Software

Avira Antivirus Premium is one of the best antivirus programs that are available in the market. The company has been working form the 20 years and is building its reputation all over the corners of the world. Avira Antivirus detects all types of threats like the spyware, worm, adware or rootkit. The full version or you can call it as paid version gives you full protection and saves you from any type of attack. It helps in protection against the phishing attacks and the drive by downloads. It also has integrated e mail scanner which detects the various types of the viruses which come and affect through the e mails.

From the time it has been built it is getting advance and more advanced and shows a regular improvement. In the newly launched Avira Antivirus 2012 there is very effective scanning. The virus bulletin provides you with cent percent protection from the viruses and the very effective programs. The anti- virus is very easy to install. You have to objectivetrack the guileless steps and get it updated regularly by just single clicking. It scans the system at a very high speed of about 17 Mbper second. It does not slow down the system if used wisely. It is aprecisetranquil to usage program. The functions and features are very simple to comprehend and custom the controls. The newly launched Avira Antivirus 2012 is little bit updated from the older versions.

The features of the program are really advanced and are very helpful in providing the protection and security and also increase the performance. The scanner works in the real time which is its very good feature. One of the other advanced and very useful features about it is that it can make the bootable rescue disk. The rescue disk can be used in case when your system crashes and do not work properly. In that situation you have to simply run the rescue disk and clean the whole system deeply.

The newly added feature in the program is the Pro Active scanning and the community network. In this there is behavior based scan. It gives threats from the programs which work in a different way over a period of time by the other programs. The antivirus data base need not to update on every minute and the updates are also not so big sized. The proxy users can also update it without any type of problem.
