â€¢ Web Intelligence Courses

â€¢ Business Objects Enterprise

â€¢ Data Services & Data Integrator

â€¢ Dashboard Designer X Celsius

â€¢ Crystal Reports Courses

â€¢ Desktop Intelligence

Web Intelligence Courses:-With SAP Business objects training, Web Intelligence, both self-service access to data and intuitive information analysis are available in one product â€“ helping your users turn business insights into effective decisions. With a few mouse clicks, users create a query from scratch, format the retrieved information, and easily analyze it to understand underlying trends and root causes. And if they don't require the full power of query capabilities, users can simply explore information in existing reports â€“ formatting and interacting with data to meet specific needs. Intelligence is the only provider that focuses on Business Intelligence training.

Business Objects Enterprise:-SAP Business Objects Enterprise software is a flexible and scalable information infrastructure that makes it easy for you to discover and share insight for optimal decision making. Built on a service-oriented architecture, the software offers an extensive set of solutions on a single platform â€“ and enables IT departments to extend BI to any application or process in any environment. Intelligence is the only provider that focuses on Business Intelligence training.

Data Services & Data Integrator: - SAP Business Objects Data Integrator software allows organizations to easily explore, extract, transform, and deliver data anywhere at any frequency. As a result, you can ensure the integrity of your data, maximize developer productivity, and accelerate data integration performance for all of your operational and analytics initiatives. Intelligence is the only provider that focuses on Business Intelligence training.

Dashboard Designer X Celsius: - Designed for midsize companies or small businesses, XCelsius software illuminates your business data by providing consolidated views of key metrics â€“ so you can answer key business questions at-a-glance. Interact with your data like never before with what-if scenarios and other visual components â€“ and use your data to make informed decisions across your entire company. Intelligence is the only provider that focuses on Business Intelligence training.

Crystal Reports Courses: - For over 10 years, intelligence has provided fully accredited, Crystal

Reports training. This leading reporting software enables you to easily design interactive reports and connect them to virtually any data source. Intelligence is the only provider that focuses on Business Intelligence training.

Desktop Intelligence: - SAP Business objects training, Desktop Intelligence software includes features that enable user-friendly information access and exploration, powerful query and offline analysis, and a market-leading business intelligence (BI) platform. Intelligence is the only provider that focuses on Business Intelligence training.
