Block Illegal content from your child

by Vicky Joseph

Article published on January 24th 2012 | Software

There are multiple reasons because of which parents want to block certain websites from their child. The biggest of them is that you donâ€™t want your child to access adult or illegal content. Other reasons may be that you do not want your child to get addicted to chat rooms or play games online for hours.

The best way to block websites from your childâ€™s view is to use website blockers onto your computer or group of computers. By blocking websites you can easily protect your child from the dangers and threats of the internet. These website blockers will keep you updated by the activities done on the internet by your child or any member of your family. You can even allow time to time access for any particular site to your child for example social networking sites.

Features of website blockers:

â€¢Works in stealth mode, silently and smoothly.

â€¢Log all webpages opened in Microsoft Internet Explorer, Mozilla Firefox, Netscape Communicator, Netscape Browser, AOL Explorer Browser, Avant Browser, Maxthon, NetCaptor, SlimBrowser and any other web browsers.

â€¢Log file downloaded from HTTP server.

â€¢Log searching keyword user used in google and yahoo.

â€¢Block unwanted websites with pre-set keyword list.

â€¢#Filter searching keyword with pre-set keyword list.

â€¢Easy to setup and use.

â€¢Export logs to HTML EXCEL format.

â€¢Send logging reports in text format to a pre-set email box.

â€¢Runs absolutely invisibly under Windows systems. Only people who have the password can close the program.

â€¢Works on Windows 2000/XP/Vista, Windows Server 2003.

Familyâ€™s safety is the most prior thing to anyone. Therefore you should provide web security to your family members especially to your children from all the internet dangers and threats. Website blocker is the only solution to curb this epidemic. This will not only help you to monitor your childâ€™s activity but also keep you ensured that your child is progressing in the right direction. You do not need to be present physically with your child to monitor his internet activities, its internet itself which provides this safety with just a click of a button.
