Convert FLV to iPod - Play FLV Videos on iPod by Vivianusgong

Article published on March 7th 2012 | Software

You may need a converter to convert FLV to iPod if you have iPod.

Why? When you want to download your favorite videos from online video sites such as YouTube, Google Video, Yahoo Video, MySpace, etc., and watch them in your iPod once you are free, you can be frustrated to find that the format is not supported. The reason is, iPod only supports MP4, H.264 video or MP3 audio, while the downloaded videos are in the format of Flash Video (.FLV). In order to play FLV video on iPod, you need to have a FLV to iPod converter.

There are many iPod video converting programs, but most of them do not work perfectlyâ€“some of them had complicated interface design, low resolution, or low conversion speed, untold bugs & problems, etc.

The proved useful FLV to iPod video Converter, is the best FLV to iPod Converter designed for iPod users. It can help you easily and fast convert FLV to iPod video, iPhone, Apple TV with good image and sound quality. With this FLV to iPod Converter, you can enjoy FLV videos and songs on iPod, iPhone, anywhere and anytime. It is also available to convert SWF to iPod compatible formats with smart editing functions.

Whatâ€™s more, the interface is quite user friendly, simple enough for inexperienced users yet powerful enough for professionals.

How to convert FLV to iPod? Follow the below guides to convert your FLV videos for playback on iPod on the go.

1. Add FLV video files to the converter

You can either click the "Add Video" button to import FLV videos to the software, or simply drag and drop files into the file list window directly. You also can drag the file to sequence them, and batch adding FLV videos in this software.

After importing the video files, you can preview the video in the preview window on the right of the main interface.

2. Video editing

Click Effect button in tool bar to open the Video Edit window, drag the bar to set the brightness, contrast, saturation and volume of the video.

This software also enables you to capture your favorite clips, remove the black edges around your movie video, customize the aspect ratio, and edit text and image watermark for the video in Trim, Crop and Watermark tab of Video Edit window.

Skip this step if you need not to edit video.

3. Choose output format and destination

Choose to convert to iPod in Profile box, click settings button after it to make detailed setting for output video, and then specify a destination folder for the output files.

4. Start converting

After finishing all the necessary settings and editing, click "Convert" to convert FLV files to iPod MP4. The whole conversion is rather fast. When the conversion completes, you can connect your iPod to computer, copy the converted FLV files to iPod.

This FLV to iPod video converter is quite easy to use, even a newbie can handle with it. In addition, it is only 6.4MB. Download it from Hodosoft instantly to freely convert FLV to iPod, and enjoy FLV videos on your iPod anywhere, anytime!
