Article published on April 11th 2012 | Software

Evolution of the Internet is actually a rebirth of computing. It has emerged as a wonderful tool and mitigated the distance between family, community and nations. Today, you are closer to your dear ones than ever before. Unfortunately, there are some people who are trying to sour the taste of it. They are using it to track, harass or make unwanted contact. National Cyber Security Alliance (NCSA) and McAfee, at Stalking Awareness Month in January unraveled a fact that about 19 percent (3.4 million) of Americans are victim of online stalking, means they are harassed with persistent emails and other aggressive outreach attempts by unknown Internet attackers. More than half of the population doesnâ€™t have faith in the local police in handling the situation. Zogby International, an international market research firm, says that two-fifths (39%) of those victims reported the incident while 61% remained silent.

McAfee doesnâ€™t need any introduction. For years it is working consistently to provide security solutions to home, businesses and enterprises across the globe. McAfee AntiVirus Plus, McAfee Internet Security, McAfee Total Protection, etc. are a few to count upon when it comes to home products. Probably you might have experienced some of the products on your system or have gone through the features and usability with McAfee reviews available with reputed brands. McAfee does send its products for evaluation to reputed software testing firms like AV-Test.org, AV-Comparatives.org, ICSA, West Coast Labs, etc. And, at times it has cornered certificates, awards and recognition as well. You can rely on the report released by these institutes, and take help of McAfee security software to combat Internet threats, identity theft, data loss, etc. However, you must affirm the system compatibility, before installing security product on your system, and remove any outdated or incompatible pre-installed security product from it, otherwise, there can be minor issues related to the installation and activation. Incorrect product settings can create problems with the networking, and you might have to confront issues while sharing Internet access, data, printer, etc. At times, it may create problems for email client or account, and errors may come while setting up and configuring account, sending/receiving/viewing mails, etc.

McAfee Support is the reliable platform, from where you can get quick solutions. This is a portal empowered by experts to remotely take care of any of the McAfee product related issues. Experts look into the system resources that might include Windows Event Viewer and Registry Settings (in Windows) and Utilities Folder (in Mac) to diagnose and fix issues. Accordingly, they will reinstall, update, upgrade, remove conflicting product, or configure the McAfee console settings to fix problems. Experts will also make sure that the product is not defying the Internet and network. They hold expertise to troubleshoot and fix all encountered problems.

All you need is to call on the McAfee Number, and let experts to have the remote-access of your system. The session of remote is guided by the industry encrypted technology, which will not allow any meddler to have access to the shared data, and experts will diagnose and fix the problem in no time. With prompt and effective tech support, you can stay protected over the web.
