Experience the Future with GSM UAE by Lords Monds

Article published on May 2nd 2012 | Software

In a short space of time, GSM UAE has rapidly progressed, and it is planning to make some big leaps in the near future as well. This article gives information about its plans and other related pieces of information. So, keep reading to know more.

Recently, GSM UAE announced they would be organizing a summit on telecommunications. This summit will be the biggest telecommunication summit, worldwide, to date. In previous years, they had also organized similar types of summits, but this yearâ€™s summit will be done on a much larger scale. The registration of this yearâ€™s summit is already 25% more than it was last year. This summit will be held for 2 days. During this summit, more than 75% of the inventions showcased will be created and completed in the field of telecommunication will be represented there. The GSM UAE summit organized will focus on spreading these ideas regarding the inventions all over the world. This summit encourages the Arab operators to come forward and express their views and thoughts about the telecommunication industry.

Currently, many countries make use of the third Generation GSM technology (3G), and many people in different countries have been experiencing problem with it. During this GSM summit, representatives of different countries will get a chance to come forward and enlist. In order to discuss and solve their problems with the help of the other industry giants present. It is hoped that the representatives will work together and help each other in the future to solve their related problems. The GSM UAE summit ensures that the representatives network and communicate with each other.

Almost 120 vendors from all over the world will be taking part in this GSM UAE summit and will present their ideas and inventions. A few of the participants in this summit are eServ Global, Actix, Huawei, Orga Systems, Nokia, Siemens Network, Convergys, Cornviva, STC and many other companies.

This event will be held at the Marina Hotel in Dubai; the hotel is geared up and ready for the event. All of the appropriate planning has already been done, so that all the guests will be attended to, in a fine manner. All of the relevant infrastructure management and appropriate arrangements have already been completed.

The main aim of the GSM UAE summit is to get rid of the current existing problems in the field of telecommunications and create great inventions for the future, making life simpler. As the name suggests, the focus will be on the improvement of the current GSM technology and developing new trends for the future. It is expected that during this summit, some developments will happen with the Smartphone (and other handheld devices), along with solving existing problems with them.
