Problem: So bad luck that I lost Windows 7 password of my Toshiba laptop. Most of my company data is stored on it. Is there a free way to solve this problem? I will also use paid method if it can help me regain access to my computer quickly.

Solution: Use Windows Password Breaker Professional

Since you are looking for a quick way to help you access your computer again, Windows Password Breaker, I think, is what you are looking for. This is the most efficient way to reset Windows 7 password that I have ever tried. By using this Windows password reset application, you are able to reset your forgotten admin password on Toshiba laptop in minutes so that you can log into your laptop again.

Windows Password Breaker comes in three editions: Standard, Professional and Enterprise. When it comes to a Windows 7 laptop, it's better to opt for the Professional edition, which can help you reset lost login password for Windows 7/Vista/XP/2008/2003/2000 with a CD/DVD or USB flash drive.

If you'd like to use Windows Password Breaker Professional to solve your problem, please prepare a USB flash drive or CD/DVD in advance. Besides, another computer that can be used to download and install apps is also required. Next you can follow the steps below:

1. Download and install Windows Password Breaker Professional in any computer.

2. Burn a bootable password reset disk with a USB flash drive or CD/DVD.

3. Insert the burned disk in your Toshiba laptop and boot the PC from the disk.

4. Reset the forgotten admin password on Toshiba to blank.

5. Log into your Toshiba computer without password.

After your forgotten Windows 7 password reset, you'll find it will cost a few minutes. If you are good at computer, it cost you less. It is 100% secure guaranteed. No any data loss or damage occurs during or after Windows password reset due to its read-only and non-destructive design. As for its success rate, it can reach 99%. And this has been tested by thousands of users world-wide.

Windows Password Breaker is efficient, but it also charges you $29.95. If you prefer a free solution, you can have a try of Ophcrack, the most popular free Windows password recovery tool. It works different form Windows Password Breaker. It is based on rainbow tables. It is a very efficient implementation of rainbow tables done by the inventors of the method. By using Ophcrack, you will retrieve the lost admin password on Toshiba laptop, rather than resetting it to blank.

Offline NT Password & Registry Editor is a good alternative to Ophcrack. It is a free Windows password reset utility that allows you to reset the password of any user that has a valid local account on your Windows system. But it is completely text based which is a little inconvenient.
