How do I convert M2TS or MTS files from Canon/Sony/Panasonic HD Camcorder? by Zola Perry

Article published on June 27th 2012 | Software

Have shot some awesome video clips in your AVCHD camcorder like Canon Vixia, Panasonic HDC-TM80, etc. Now, you try to share them with your family or try to edit them in Windows Movie Maker which has bad compatibility with AVCHD file format.

In the case, you may need to convert the original MTS to WMV is a way out, for WMV is Windows-friendly file format. You can try to the easy-to-use MTS Video Converter, featured with its intuitive interface, high conversion speed, excellent output quality, and useful editing features.

WMV (Windows Media Video) is a video compression format developed by Microsoft. As a competitor to RealVideo, the WMV is originally used for Internet streaming application. As it is a friendly file format, for it can well playable on Windows Media Player, so do mobile media devices like PSP, BlackBerry, iRiver, etc.

Note: What's MTS file format:

MTS file format, also called AVCHD, is used for high definition video file, which is commonly associated with camcorders from Sony, Panasonic and others. While MTS files can be viewed in few media players, they can't be played in desktop applications pre-stalled in Windows Vista, Windows XP, and even can't be customized in video editing programs.

Step by step on how to convert MTS to WMV:

Step 0: Free download the MTS Video Converter on your Windows OS (Windows 7 included)

Tip 1: The application can also support MTS/M2TS files from a variety of HD camcorders like: Canon VIXIA HF200, Canon FS200, Canon VIXIA HFS100, Canon VIXIA HG21, Panasonic HDC-HS300, Panasonic HDC-HS20, Sony HDR-CX100, Sony DCR-SR47, JVC GZ-HD40, JVC GZ-HD10 etc.

Tip 2: If you are running on Mac OSX, you can refer to the Mac version of Video Converter, which can convert MTS files on Mac, like MTS to MOV, AVI to Final Cut Pro for editing and so forth.

Step 1: Click button "Add File" to add the MTS video files you want to convert.

Step 2: Specify the output format as WMV under the menu of "Profile", and set the output destination folder.

Step 3: Hit "START" button to do the conversion from MTS to WMV.

In the pop-up window, there are two options provided for your preference: "Shut down computer when conversion completed" or "Open output folder when conversion completed" there.
